

# Nuheat Standard Mats

## THE THINNEST PRE-BUILT ELECTRIC FLOOR HEATING MAT

Our heated floor mats are pre-built and are ready to use right out of the box – making them the easiest product to install on the market today. Our standard mats are only 1/8" thick, making them the thinnest pre-built mats to use for floor heating projects.

Suitable floor surfaces for installing Nuheat Standard Mats includes tile, stone, laminate and engineered wood. See our recommended list of materials you will need below and some instructions on how to install Nuheat Standard Mats for such surfaces.

## TILE/STONE/LAMINATE/ENGINEERED WOOD APPLICATIONS

### LIST OF MATERIALS NEEDED:

1. Acrylic or latex modified thinset
2. Duct tape
3. ¼ inch square notched trowel
4. Grouting float
5. Digital multimeter (ohmmeter)
6. Thinset mixer
7. Bucket
8. Flat trowel

Standard-sized shaped (square and rectangular shaped) Nuheat electric floor heating mats come out of the box ready to fit the room. Installing Nuheat electric floor heating systems is very easy. The electric floor heating mats are installed directly onto the subfloor and tiling can begin immediately. When installing on a laminate or engineered wood floor, a thin layer of thinset should be used.

**LEVEL OF DIFFICULTY:** Easy

### ESTIMATED TIME:

25 minutes for tile/stone floors  
(based on 50 square feet)

35 minutes for laminate/engineered  
wood floors (based on 50 square feet)
