

Nuheat Measuring Instructions

- Step 1 Sketch the shape of the room.
- Step 2 Measure the inside perimeter of the room, finishing at the same corner you started.
- Step 3 Locate and measure the toilet, cabinets, vents, floor drains, etc.
- Step 4 Indicate thermostat location and voltage, if known.

Please do not make any allowances for Nuheat coverage, our in-house Design team will design your mat with a 2-4" offset to allow for minor adjustments.

Checklist

- Thermostat location
- Flooring type: Tile Laminate
- Voltage: 120V 240V
- Floor vent locations identified
- Obstructions shown - toilet, cabinets, plumbing, pony walls, etc.
