

Measuring Instructions

1. Pick a corner of the room and use that as the starting point for your measurements.
2. Measure and draw the walls of the room on paper and record the measurements.
3. Measure and draw the location of cabinets and vanities, making sure to take the measurement right up to the toe-kick.
4. Measure and draw the location of floor features such as vents and toilet drains (measure from the walls to the center of the toilet drain).
5. Indicate the thermostat location and voltage if known.

Checklist

- Thermostat location
- Voltage: 120 V 240 V Unknown
- Floor vent locations identified
- Obstructions shown – toilet, cabinets, plumbing, pony walls, etc.
- Watts/sq. ft.: 10 12 15
- Shower to be heated? Yes No
